Clergyman's Son's Testimonial of Tuberculosis Cure

To neglect a cold, bronchitis, lung trouble or Consumption is dangerous. We all know how true this is. It is to deny they have Consumption. It is a baffling disease, and the sufferer, in Tuberculosis. No one need doubt about it—there is plenty of evidence from live witnesses. Investigate the following:

Amelia, N. Y., July 9, 1909. Gentlemen: Prior to Feb., 1908, I was located to Rochester, N. Y., suffering with Tuberculosis, which developed into Tuberculosis. My physical condition was such that I was unable to do any work. I was having terrible night sweats and mid-day chills and losing flesh rapidly. I coughed and raised continually and became so weak that walking a few feet exhausted me. On my return home, my regular physician gave me little encouragement. My father, who is a clergyman, heard of Eckman's Alternative and induced me to take it. The night sweats and chills disappeared, my cough became easier and they could breathe freely. In a few days I developed an appetite, the first in months. I am now in perfect health and am able to do my father's work. I owe my life to Eckman's Alternative.

E. H. COWLES
Eckman's Alternative is good for Throat and Lung Trouble and is on sale at Red Cross Pharmacy and other druggists. Ask for booklet of cured cases, or write to Eckman Mfg. Co., Phila., Pa.

of household and family. She brought her children up in Spartan simplicity. They were put on parades as soon as they were old enough. They were taught all open-air sports and given the freedom of farmer's children. They ran perfectly wild outdoors; in fact, they were brought up exactly as the average well-to-do farmer's children might be, if they later were given all the advantages of education.

"Aside from the fact of horses innumerable and land almost without end, there was no evidence of wealth. They kept open house, with really southern hospitality, but it was all done in the simplest way."

"The big 'American room' was the living-room at Arden. Everything in it was American—wood, iron, glass, rugs, furniture and skins. There was one piece in it that came from Honolulu, but Mrs. Harriman said that she would not have had it in that room before the annexation of Hawaii to the United States."

"That Mrs. Harriman was the only person in the world supposed to be entirely in Mr. Harriman's confidence is well known. The will conferred upon Mrs. Harriman the right to dispose of the property as she saw fit. That a great master of complicated finance like Mr. Harriman should have turned his whole fortune over to his wife seemed to the public a curious thing. It had been quite naturally supposed by business men that the will would disclose the property lodged for administration in the hands of trustees. Such guesses, however, were entirely made without adequate knowledge of Mrs. Harriman's qualities, one of which is remarkable personal simplicity as contrasted with the extravagance of most New York society women. She impresses on as being independent of fortune and lady's maid alike—naturalness and simplicity are her chief notes. Her children were brought up without ever suspecting that their father was even a moderately rich man."

"In the house, now, Mrs. Harriman wears white always. Mr. Harriman disliked black."

SEVENTY ADDRESSES.

Will Be Given at "Vermont Farmers' Week" at University of Vermont.

Burlington, Feb. 2.—Seventy addresses will be given and more than a dozen demonstrations held at the "Vermont Farmers' Week" to be held at the university of Vermont, February 14th to 18th, in cooperation with the state commissioners of agriculture. Nearly thirty speakers and demonstrators take part, all of them experts in the matters with which they deal. The addresses and demonstrations will cover a wide range. Many of the former will be lantern illustrated, and one, on agricultural practices good and bad, will be illustrated by moving pictures. The first time it is thought that this means of conveying information has been used in New England for agricultural educational purposes. Several lines of work will be going on coincidentally, so that those attending can elect according to their personal predilections. While the nature of the talks and demonstrations are more or less varied, attempts have been made to specialize in the interests of those unable to stay the entire time. For example, much will be made on Thursday and Friday, 17th and 18th, of dairying, horticulture, and forestry; on Tuesday and Wednesday, the 15th and 16th, of the talks and demonstrations on Tuesday, the 15th, of poultry and on Friday, the 18th, of stock feeding and commercial fertilizers; on Wednesday, the 16th, of the construction of farm buildings; while general agriculture will be discussed throughout the week. It is hoped, but cannot be sure at this writing, that some of the domestic science lectures and demonstrations will be offered on Thursday, the 17th. No charges of any kind are made. All sessions are entirely free. The last year's Farmers' Week was well attended and it is hoped that this year's will be full to overflowing. For program address J. L. Hills, Morrill Hall, university of Vermont, Burlington, Vt.

TO PALE, THIN PEOPLE

Druggist D. F. Davis offers to Pay for

Samosee if it Does Not Make Thin People Fat.

Samosee, the remarkable flesh-forming food, should be used by all who are pale, weak and thin. It mingles with the food and aids assimilation, so that when taken for a short time nature will soon assert her normal powers, and the food that is eaten will give strength and good flesh. Weigh yourself before you commence the use of Samosee, and you will notice a steady gain. Samosee is a scientific flesh-forming food that restores the thin and scrawny to their proper weight and builds the weak and debilitated with vigor and vitality. Such remarkable results have followed the use of Samosee that Druggist Davis is willing to pay for the treatment if it does not give the desired results. He makes this offer generally and wants all who are thin, weak and out of health to get a box of Samosee from him on those terms.

Cushman & Ward

ABOUT THE STATE

D. N. Nicholson of Burlington, the well-known furrier and former grand master of Masons, is going out of business on account of failing health.

Miles Robson of Bennington severely injured two fingers of his right hand in the gear of a machine Saturday afternoon, while engaged in cleaning machinery at Holden Leonard & Co.'s mill.

Considerable hay is being moved about Sutton early this winter; several loads are weighed at the hay scales every day. The price is \$15 the ton at the barn and some have refused to sell more at that price.

Bennington is to have a district visiting nurse, for the benefit of families who are unable to hire a nurse to give them their full time. Through the King's Daughters the services of Miss Edith Grover of the Boston District Nursing association has been secured and she began her duties Monday.

Eugene Kimball was injured Saturday while working with a wood-sawing machine in Rutland. He slipped and fell backwards, so that the wheel of the saw, on which the machine was placed, struck the back of his head, inflicting a severe gash. A number of stitches were necessary in order to close the wound.

Town Clerk J. F. Miles and Mrs. Miles celebrated the 67th anniversary of their marriage last Sunday at their home in Hinesburg. Dr. Miles was 90 years of age January 2, and has been town clerk for 20 years. He is at the office every day. Mrs. Miles is about 90 years of age and is able to be about the house every day.

James Alexander died recently in Lawrence, Mass., where he had made his home for the past year. Previous to that time, he was a resident of Windsor, Vt., where he was a well-known citizen. He was a member of the Windsor branch of the Grand Army of the Republic and was a member of the Windsor branch of the Grand Army of the Republic.

The only thing that prevented a serious wreck of a Delaware & Hudson passenger train on the high ridge, near Otter Creek at Center Rutland, Friday was the heavy guard rail. The snapping of a journal dislodged a tender truck and one of the wheels jumped the ties clear across the bridge, while its mate was poised in the air. The crew was ignorant of danger until the train was stopped at the end of the bridge by the bursting of the air-line.

The Bennington, Vt., correspondent of the Troy, N. Y., Times writes: Hay of a good quality is selling from \$15 to \$20 a ton and is not in very free supply at those figures. On account of the unusual severity of the winter, stock on the farm has consumed more hay than in former winters, and as a result, the shortage in hay is becoming evident. A prominent farmer stated that unless an early spring set in he expected that hay would touch the \$25 a ton mark. It is said by some farmers that ensilage has not kept well during the winter, a great deal of it being moldy, and this has led to feeding more hay.

Edmond LaFrance of West Rutland, who was injured about the face last week by an explosion of a charge of dynamite at the Patton quarry in Rutland, is making a satisfactory recovery. Most of the bandages have been removed from his face. His left arm is black and LaFrance thinks he must have been struck there with a piece of dynamite at the time of the explosion. He had a very narrow escape from being dashed to death at the time, and when picked up his feet were hanging over the edge of a "log" which had a drop of over 80 feet, and the frames of the glasses which he wore were found at the bottom of this place.

Thomas Battles, 20 years old, had a narrow escape from a fatal accident Sunday at the Eastman Marble quarry in West Rutland. In company with several other men, Battles was at work in getting out what is known as a key block. For this purpose a large iron bar is used to get under the block and a large plank is put on the end of the bar. Several men walk the plank and thus loosen the block, which is followed up with wedges to prevent its slipping back. In some way, the wedge did not hold the bar, and the falling block caused the heavy bar to fly out of place. Battles was struck a glancing blow in the groin by the flying bar. Had it hit him squarely, the chances are that he would never have been taken from the quarry alive.

Don't Need a Crutch.

When Editor J. P. Sessman of Corvallis, N. C., braced his leg badly, it started an ugly sore. Many salves and ointments proved worthless. Then Bracken's Arnica Salve healed it thoroughly. Nothing is so prompt and sure for ulcers, boils, burns, bruises, cuts, corns, sores, pimples, scabs or piles. 25c at Red Cross Pharmacy.

A 50-Cent Bottle of Scott's Emulsion

Year's Emulsion will last a year-old baby nearly a month, and four bottles over three months. Given in small doses four times a day.

Scott's Emulsion

will lay the foundation for a healthy, robust child. It never fails to make the cheeks rosy, the flesh solid and the bones strong.

Send the name of paper and this ad. for our beautiful Scott's Emulsion and Child's Emulsion. Each bottle contains a good lunch money.

IN LOCAL MARKETS

Fresh Eggs Remain Firm as Last Week

DRESSED PORK AS WELL

Dairy Butter Is Reported to Be More

Plenty To-day—Quotations from

Ricker's and Boston Markets

Are Given.

Barre, Vt., February 2, 1910.

Fresh eggs and dressed pork firm at

last week's prices. Dairy butter more

plenty. Wholesale quotations:

Dressed pork—10½¢ to 11¢.

Veals—Fancy, 10½¢ to 11¢.

Lamb—12¢ to 14¢.

Poultry—12¢ to 14¢.

Chickens—20¢.

Fresh eggs—30¢ to 32¢.

Butter—Creamery, 32¢ to 34¢; dairy, 30¢ to 32¢.

Potatoes—45¢ to 50¢ per bushel.

RICKER'S MARKET.

Receipts Light, with Prices Holding Firm.

Market Quiet.

St. Johnsbury, Feb. 2.—The receipts at W. A. Ricker's market for the past week were:

Poultry—250 pounds, 11¢ to 12¢.

Lamb—20, 30¢ to 35¢.

Hogs—65, 7½¢ to 8¢.

Cattle—42, 2½¢ to 3¢.

Calves—100, 30¢ to 35¢.

IN BOSTON MARKETS.

Egg Market Steady, but Many Receipts

Would Result in Lower Price.

Boston, Feb. 2.—The week starts off quietly in the local market for dairy products and with prices little changed from those of last week. There is but little business in butter, but receipts are light, and the market also is helped by the steadiness of other markets. Cheese continues firm, not so much because the demand is good, but rather because supplies are light and are steadily growing more so. The supply of eggs is running along pretty nearly even with wants, and the market is fairly steady. Any material increase in the offerings, however, is likely to result in lower prices.

Jobbing quotations:

Butter—Fancy northern creamery, 34¢ to 35¢; boxes and prints 32¢ to 34¢; western ash tubs 33¢ to 34¢, fair to good creamery 30¢ to 32¢, fine storage creamery 32¢ to 34¢, dairy 30¢ to 32¢.

Cheese—New York full cream fancy 18¢ to 19¢, Vermont 18¢ to 19¢, Wisconsin Young America 18¢ to 19¢, sage 18¢ to 19¢.

Eggs—Fancy henery 30¢ to 32¢, choice eastern 28¢ to 30¢, fresh western 28¢ to 30¢, storage 26¢ to 28¢.

Mrs. Winslow's Soothing Syrup

The best for colic, BILIOUSNESS, and all the troubles of INFANTS, and for ALL THE AFFECTIONS OF THE THROAT, LUNGS, AND BRONCHES, and for ALL THE AFFECTIONS OF THE STOMACH, AND FOR ALL THE AFFECTIONS OF THE LIVER, AND FOR ALL THE AFFECTIONS OF THE SPLEEN, AND FOR ALL THE AFFECTIONS OF THE PANCREAS, AND FOR ALL THE AFFECTIONS OF THE GALLBLADDER, AND FOR ALL THE AFFECTIONS OF THE BILE, AND FOR ALL
